

## AssureSign® Insurance Solutions

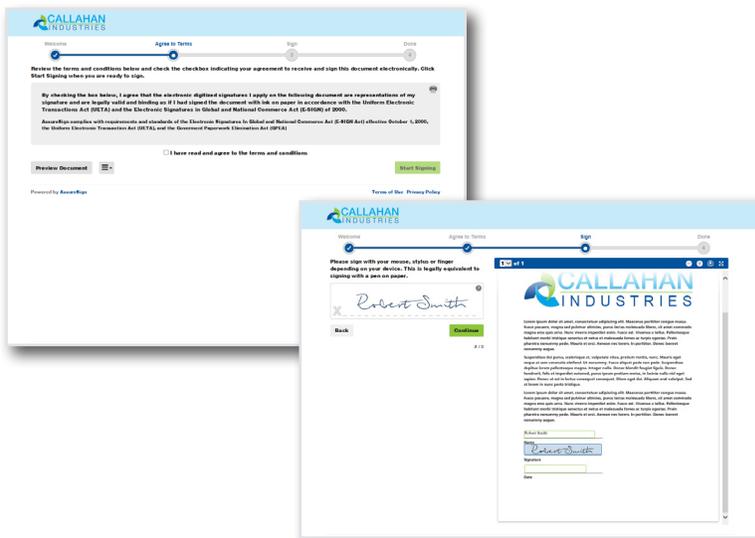

AssureSign Electronic Signature Technology allows carriers and agencies to expedite customer acquisitions and renewals through various distribution channels, including agency portals, carrier consumer portals and internal CSRs. Insurance carriers have invested numerous resources into rolling out real-time rating and quoting web-based portals for their agents and consumers. However, in most cases, the consumer is still required to sign a policy manually and mail or fax it back to the home office or agent.

Integrating AssureSign into your existing workflow enhances the process by increasing revenue while cutting costs. Plus, AssureSign's sophisticated workflow allows for multiple signatories to sign the same document, as well as the ability to route documents to anyone else that requires a copy of the agreement.

AssureSign Electronic Signature Technology is a web-hosted application that easily integrates with existing policy management systems and processes to secure legally binding electronic signatures without the need for hardware or software.

With AssureSign:

- Get policies closed in minutes not days - AssureSign customers have experienced as much as 65% increase in policy closure
- Accelerate the document execution process - Eliminate the need for fax, courier and mail
- Eliminate geographic boundaries - Expand reach to new geographic markets
- Track the entire process electronically - Expedite the process with additional follow-up as necessary.

## FEATURES

Accelerate the document execution process. Get policies closed in minutes, not days.

Eliminate geographic boundaries - Expand reach to new geographic markets.

Track the entire process electronically. Expedite the process with additional follow-up as necessary.

## BENEFITS

Increase sales and improve productivity

Reduce costs by saving paper-related expenses, minimizing errors and reducing product design time and software development costs

Maintain control: Monitor the policy execution process; close policies while speaking with customers.

Meet legal requirements with an E-Sign Act and UETA compliant solution. Reduce E&O exposure.
